Order Sheet for Plants and Bulbs

We always recommend having plants sent by express, at purchaser's expense, when there is an express office near, as we can usually send somewhat larger plants, and do not have to wash the soil off the roots (as in the case when sent by mail). We always try to add enough extra plants of our own selection to help pay the charges. Kindly write your list of plants all together on this page (not mixed up with the seeds) so as to prevent any mistake upon the part of our clerks in copying the order. We do not ship plants to Canada, Mexico and Foreign Countries. Be sure to read instructions for ordering on Page 2 of Catalog.

LOWEST PRICES

We Do Our Part

For over sixty years it has been our policy to furnish the best quality seeds at lowest prices. This year, in spite of increased costs all along the line, we believe our prices are the lowest you will find.

In line with our President's plan of recovery we have increased wages of the people working for us. This means that it costs more to grow, package and ship seeds than a year ago, but I made up my mind that we would do our part toward our customers, too, and hold prices down to rock bottom.

You will get the same full measure packets of Buckbee's "FULL OF LIFE" Seeds as ever before, and the quality will be fully up to standard. We have made our savings through efficient managing and wholesale production and passed these savings on to you. By buying direct you save the cost of a middleman's profit or salesman's commission.

Read These Few Words About Reliable Seeds

From good seeds only can good crops be grown. Yet a great many contingencies may arise to prevent the best seeds from giving satisfaction, and for all these reasons we cannot, of course, guarantee or be responsible for a crop, as success is dependent upon natural causes, which are beyond human control. Therefore, we do not warrant in any way, express or implied, the contents, or the description, quality, productiveness, or any other matter of any seeds, bulbs, or plants sold by us, and we will not be in any way responsible for the crop. If the purchaser does not accept these goods on above terms, no sale is made thereof, and he must return them at once, and money will be refunded. Subject to above conditions we make this sale, at the moderate prices at which we sell our goods.

We will appreciate receiving your order early this year.

Yours for Success,

H. W. Buckbee

ASPARAGUS SEED

Every home and kitchen garden should have a bed of Asparagus, one of the most profitable garden crops.

Perfection

Large, Tender and Delicious. Our Best Seller
This is unquestionably the most popular variety and one of the most satisfactory introductions of recent years. At three years old this variety has yielded at the rate of \$500.00 per acre. In short, it has all the qualities demanded for the market and will prove itself to everyone who grows it to be true to its name—Perfection. It is deliciously tender, extra large, early, uniform, prolific, crisp and greenish white. Pkt. 5c; oz. 10c; ¼ lb. 25c; ½ lb. 45c; lb. 75c, postpaid.

New Washington Rust Proof

Developed by the U. S. Department of Agriculture

The New Giant Rust-proof Variety. Plants grow rapidly and produce uniformly long shoots of superior table qualities. An asparagus bed is a permanent investment, therefore plant the best obtainable. Pkt. 10c; oz. 25c; ¼ lb. 40c; ½ lb. 75c; lb. \$1.25, postpaid.

New Mary Washington

This variety seems to be the top-notch among rust-resistant sorts. It is very early, producing large shoots even the second year from seed. These are very large, frequently an inch in diameter, with a tendency to be oval in cross-section. Its high-branching habit makes it possible to cut shoots, with good tight tip buds, as much as 2 feet long. The seeds of New Mary Washington are large and produce strong, thrifty seedlings right from the start. Pkt. 7c; oz. 15c; ¼ lb. 35c; ½ lb. 55c; lb. \$1.00, postpaid.

Asparagus Roots—See page of Root Crops.

Brussels Sprouts

MATCHLESS—The finest strain of sprouts. The plants are of strong, vigorous growth, closely jointed and are covered the entire height with very large, solid, tightly folded sprouts of exquisite quality. The plants are quite hardy, are not injured but improved by hard frosts and are left in the gardens or field during winter until wanted. These miniature Cabbages may be boiled like cabbages or cooked in cream like Cauliflower. They are the most delicious and delicately flavored variety of the Cabbage family. Pkt. 10c; oz. 25c; 2 oz. 45c; ¼ lb. 80c; ½ lb. \$1.40; lb. \$2.50, postpaid.

Broccoli—New Italian Sprouting

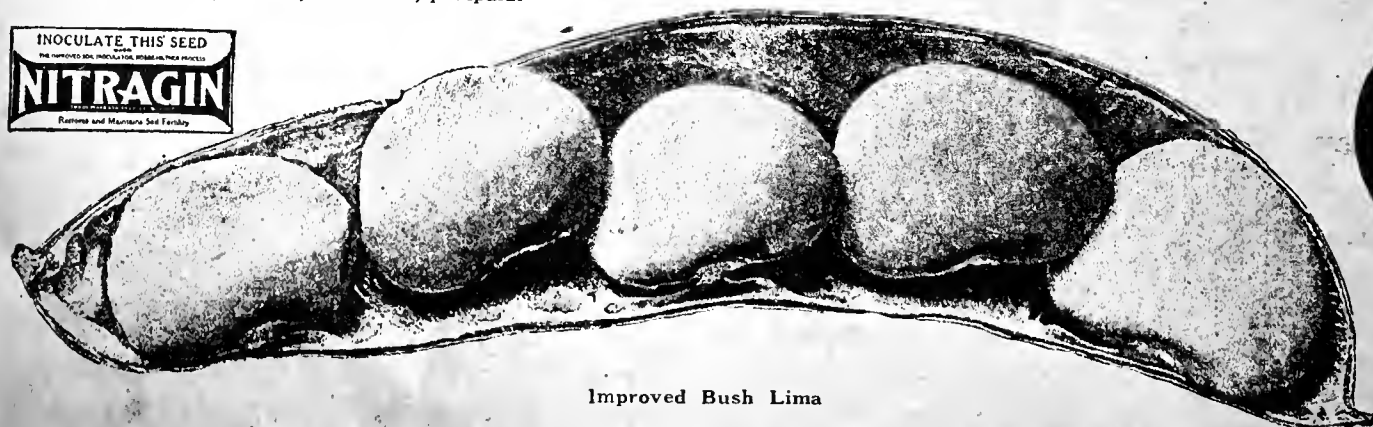

This new Broccoli instead of forming a head like Cauliflower, produces from the center of the plant a compact bunch of green buds which is cut and used as is Cauliflower. This is the tastiest Broccoli ever raised. See illustration. Pkt. 10c; ½ oz. 25c; oz. 40c; ¼ lb. \$1.35; ½ lb. \$2.75; lb. \$5.00, postpaid.

BUSH LIMA BEANS

Our Improved Bush Lima

Superior Quality, Exquisite Flavor, Fine Color, Good Shipper, Hardy Grower, Enormously Productive, Matures Early, Excellent Keeper

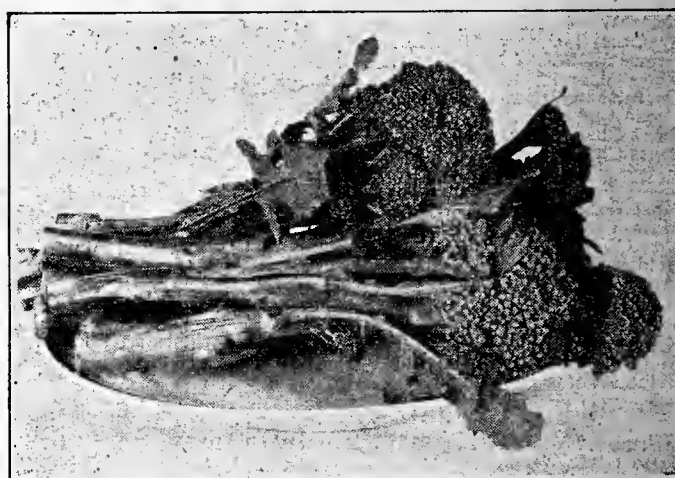

This is the very "newest" in the Bush Lima Bean. It greatly excels all other Bush Limas in productiveness, being practically loaded down with pods continuously from early Summer till frost. It matures extremely early. Is suitable, therefore, for all sections North and South, and is a continuous bearer until frost. In size the Beans are what might be termed intermediate, not so large as the Burpee Bush Lima, but considerably larger than the Henderson's Bush Lima, making it, in our estimation, the finest size for all purposes. The bush is sturdy in habit and about 24 inches high, having good large leaves. It bears its fruit on long spikes in heavy clusters well out from the plant. There are several pods in each cluster, as many as ten having been counted. Each pod contains on an average of four Beans, though there are more containing five than three, so you see that it is a great improvement over the old-fashioned Bush Limas which oftentimes have only one or two in a pod. Considering the large number of pods on a bush, the yield is amazingly enormous. In quality the Bean is par excellence, flavor unsurpassed, and color the very best, both before and after cooking. Valuable also as a shell bean for winter use. 2 oz. pkt. 10c; ½ lb. 30c; lb. 50c; 2 lbs. 75c, postpaid.

Improved Bush Lima

New Jackson Wonder Bush Lima

Medium Size, Beautifully Colored Speckled Beans

This is the most productive and very earliest of the Bush Limas. It is of true bush form, about 2 feet high, bearing in greatest profusion, broad, flat pods, each having from three to five medium-sized, handsomely speckled Beans, which cook quickly and are of superior quality. Good for Summer use, and as Winter shell Bean. A splendid Bean for the home garden. 2 oz. pkt. 10c; ½ lb. 20c; lb. 35c; 2 lbs. 65c, postpaid.

Burpee's Improved Bush Lima

The Earliest Large Seeded Bush Lima. One of the Best for Market as Well as the Home Garden

This is the earliest of the large seeded Bush Lima Beans. The first pickings fit for the table may often be taken in July and from that time until frost a continuous supply may be gathered. It is fully 8 days earlier than the old Burpee's Bush Lima and produces larger pods and more and larger Beans in the pod than this variety; the seed is also considerably thicker. The plants grow upright about 30 inches in height and often measure 24 inches across the top. 2 oz. pkt. 10c; ½ lb. 25c; lb. 45c; 2 lbs. 75c, postpaid.

$1\frac{1}{2}$ pounds will plant 100 ft. of row. Sow 60 lbs. seed to an acre.

Beans are the one vegetable that will grow anywhere. It is useless to plant them before the ground has become warm, and danger of early frost is past. Plant $1\frac{1}{2}$ to 2 inches deep in rows $1\frac{1}{2}$ to 2 ft. apart and 2 to 4 inches apart in the row. Cultivate thoroughly until they commence to bloom, but never when the ground or plants are wet with rain or dew, as it would be sure to injure them and cause them to rust.

New Monarch Wax

The Only "Sure Crop" Wax Bean Ever Grown. Heavy Yielder. Entirely Stringless. Large Pods. Beautiful Color. Sure Cropper. Crisp and Tender

Our New Monarch Wax Bean is a very sturdy and vigorous grower and as near rust proof and disease resistant as it is possible for a bean to be. One of the earliest wax beans ever grown, starting to bear within 60 days after planting and continues its bearing season longer than most others. Pods are of splendid quality, fleshy, and are stringless at practically all stages of their growth. From 6 to 7 inches long by ½ inch through and almost round, they make a wonderfully heavy yield, and the beautiful golden yellow color sells them easily. Seed is long, oval, medium size and purplish black color. In common with other black-seeded varieties, this bean may be planted quite early in the season. Practically rust proof, owing to the habit of the plant which branches freely but is perfectly sturdy and upright, every branch carrying a head of magnificent pods. As nearly all of the pods are produced underneath the foliage, excessive heat does not affect it in the least, a very valuable feature whether grown for home, the market garden or for shipping long distances. As a canning bean New Monarch is without an equal, as the pods are long enough to fill the jar and the beautiful color is retained after cooking. 2 oz. Pkt. 10c; ½ lb. 25c; 1 lb. 40c; 2 lb. 70c, postpaid.

New Yosemite Mammoth Wax

The pods frequently attain a length of 10 to 14 inches, with the thickness of a man's finger, and are nearly all solid pulp, the seeds being very small when fit for use. They are of rich golden color and are absolutely stringless, cooking tender and delicious. 2 oz. 8c; ½ lb. 20c; 1 lb. 35c; 2 lb. 60c, postpaid.

When allowed to mature the shelled beans are of pure white color, good sized and most excellent for Winter use. The vines begin to bear pods quite early and continue to produce enormous quantities until frost.

MANGEL WURTZELS

Any land that will grow a good crop of Corn will produce a good crop of Mangels or Sugar Beets, which are surer crops than any other root.

Mangels give one-third greater increase of milk in feeding cows than does the same weight of Potatoes. Forty tons Mangels (a crop of an acre) have as much nutritive matter as 130 bu. of corn and are more digestible. Send to Secretary of Agriculture Washington, D. C., for Special Bulletin on Mangels and Beets. Plant five pounds of Seed per Acre

Mastodon

The Heaviest Cropping and Largest of All Mangels

It is truly a Mammoth, a single root often weighing 75 pounds and over; in yield it is enormously productive—1,500 to 1,800 bushels per acre is nothing uncommon on good soil. It grows well above ground and on account of its shape is easily harvested. In length is about the same as Mammoth Long Red, but is more remarkable for its handsome shape and broad shoulders, the diameter being greater, and in weight much heavier; flesh deep red, fine texture, roots solid, tops small. Oz. 10c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 45c; 1 lb. 80c; 2 lbs. \$1.55; 5 lbs. \$3.80; 10 lbs. \$7.50, postpaid.

Improved Mammoth Long Red

A standard and favorite Mangel, producing a very large root uniformly straight and well formed, weighing from 30 to 40 pounds each, of a beautiful dark red color, wonderfully productive, average 1,000 to 1,500 bushels per acre. Keeping qualities not excelled. Oz. 8c; 2 oz. 12c; ¼ lb. 18c; ½ lb. 32c; 1 lb. 60c; 2 lbs. \$1.10, postpaid.

Golden Tankard

An immense yielder and 60 to 75 tons per acre have often been grown on good ground and under good cultivation. The roots are handsome, of an ideal, cylindrical form, with small neck, clean, generally with only one tap-root, and can easily be lifted, and are excellent keepers. The skin is light gray above and deep orange below the ground, the flesh is bright golden yellow, differing from all other varieties, which cut white. Oz. 7c; 2 oz. 10c; ¼ lb. 15c; ½ lb. 28c; 1 lb. 50c; 2 lbs. 95c, postpaid.

Golden Monarch

This entirely new and distinct Mangel grows to the largest size and is of a beautiful russet yellow color. The flesh is white, firm and sweet, greatly relished by cattle and other stock. The roots are large, ovoid shaped with small tops admitting close planting. Easily lifted, growing more than half above ground, producing enormous crops, and is an excellent keeper. Oz. 8c; 2 oz. 15c; ¼ lb. 25c; ½ lb. 40c; 1 lb. 70c; 2 lbs. \$1.35, postpaid.

SUGAR BEETS for STOCK FEEDING

Seeds Are Bred for Disease Resistant Qualities

Giant Feeding Sugar

The Greatest Beet for Feeding Stock

The magnificent Sugar Beet, while giving nearly as large a yield of easily grown and harvested roots as a crop of Mangels, supplies a food of very much higher nutritive value, being much richer in sugar. They yield, under equally favorable conditions, more than double that of sugar beets and, not being so sweet, are less liable to injure the kidneys when fed in large quantities. The roots grow about two-thirds out of the ground and because of this and their shape the crop can be harvested and stored at less expense than any other root crop. Roots very large, smooth, clean and of oval shape; white skin, white flesh. Every farmer should try it. Oz. 8c; ¼ lb. 18c; ½ lb. 30c; 1 lb. 55c; 2 lb. \$1.00, postpaid.

New Imperial Sugar

This Beet is the result of years of methodical and persevering selection. It is extremely rich in sugar, thousands of analyses showing that the average percentage of sugar obtained from this variety is about eighteen and its average yield may be stated as from 15 to 16 tons an acre, but crops of 25 to 40 tons per acre have been obtained off it. Flesh finely grained and very sweet. We sell thousands of pounds each year to the large growers and Beet sugar factories through the country, always with the most satisfactory results. Oz. 10c; ¼ lb. 20c; ½ lb. 35c; 1 lb. 60c; 2 lb. \$1.10, postpaid.

New Extra Early Race Horse

Absolutely the Earliest Cabbage in Cultivation—Indispensable to the Market Gardener for His Very Earliest Crop. Extra Early—Sure Header—Good Keeper—Attractive Appearance—Desirable Shape and Size.

Race Horse is ready for use in sixty days from sowing—ten days earlier than Jersey Wakefield. The plants are very hardy and can be set out very early; they are always sure to head, making good sized, solid and firm pointed heads, which, though a little smaller than Jersey Wakefield, are always marketable, and being first in the market bring high prices. There are but few outer leaves and the plants may therefore be set closely together; they will then yield large crops, and as many as 14,000 heads have been grown of this variety on one acre, which brought a larger profit per acre than later and heavier varieties. The heads are very attractive in appearance, of splendid quality, tender, fine grained and of sweet, delicious flavor. Earliest of all Cabbage. Pkt. 10c; oz. 30c; 2 oz. 55c; ¼ lb. \$1.00; ½ lb. \$1.80; lb. \$3.25; 2 lb. \$6.00, postpaid.

Extra Early Winningstadt

Chinese or Celery Cabbage

A Most Delicious, New Vegetable Which Should Be in Every Garden and Which is One of the Most Profitable Crops to Grow for the Market.
As Tender as Lettuce; Flavor as Delicate as Celery

The Chinese or Celery Cabbage belongs to the Cabbage family; when young, it resembles a smooth-leaved Chard-Beet, leaves being light green and crimped; the plant as it matures forms heads much like Cos Lettuce, which are about 15 inches high, have a diameter of 6 to 8 inches, often weigh 4 lbs., and are as firm and solid as Cabbage; their heart blanches to a crystalline white, whiter than any Lettuce or Cabbage. The leaf is as tender as Lettuce and has as distinctive a flavor, being very delicate and pleasant; every leaf, including the outside ones, is tender and edible. It is served on the table like Lettuce with French dressing; or if cut up like Cabbage and served with mayonnaise or French Dressing, it makes a splendid cold slaw. It can also be cooked like Cabbage, but it is without the strong Cabbage flavor and tastes more like Cauliflower. Our seed is Chinese grown, which is the only reliable stock for good solid heads. CARROTS

The best soil for the Carrot is a sandy loam made rich by manuring the previous year; any good land if thoroughly and deeply worked will produce satisfactory crops. It is advisable to sow as early in the Spring as the ground is fit to work, though good crops may be grown from sowings as late as June 15. For table use sow the smaller kinds early in rows 16 to 18 inches apart. For field culture sow in drills 18 to 24 inches apart, using from 1½ to 3 pounds of seed to the acre. Cover ½ to 1 inch deep and see to it that the soil is pressed firmly above the seed. As soon as the plants appear, use the cultivator or wheel hoe. Thin 2 to 6 inches apart in the row, according to the size of the variety.

The Best Stock Carrots

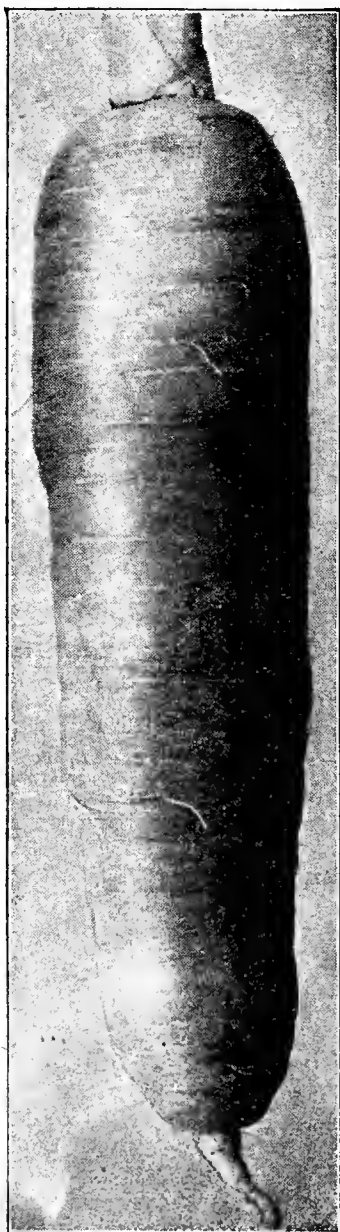

Every farmer should plant a few acres of Carrots for stock food; they are very productive, less liable to disease than many other root crops, and being sown earlier do not interfere so much with the labor in the busy time. They can be stored over Winter like Potatoes. Make excellent nutritive feed for all stock. Horses are very fond of them and they increase the flow of milk in cows, improve the quality of butter and give it a beautiful golden color.

Early Chief Cauliflower

The Earliest Grown—A Sure Header—Drought Resister—Large Solid Heads of Snowy Whiteness

The best variety for either market or family purposes, by far the earliest and surest large header and the most profitable grown. It is of very compact growth, with very short stalks. SWEET CORN

Everbearing

If You Want Delicious Corn on Your Table the Fourth of July Plant This Extremely Hardy, Early Maturing, Large Eared Sort

We have produced in this early corn a variety which stands alone as a money maker. It is in the same class as the Earliest of All Sugar Corns, considerably larger and, best of all, contains a sweetness equal to most true sugar varieties. It has the power of germination under conditions where all others have failed and can safely be planted much earlier than any true sugar corn on account of its extreme hardiness. It adapts itself to any kind of soil, either sand or heavy clay.

It is as large as Stowell's Evergreen. The fodder grows 6 feet high; no small item to a gardener; and, as a proof of its quality and sweetness, we have a continuous call for "Everbearing" from our customers year after year. The ears are of good size and covered with kernels clear to the end of the cob. Each stalk will produce one to two well developed ears. Now, if these are picked when mature, one or two and even four more ears will set and develop on the same stalk during the next two to four weeks. Pkt. 10c; ½ lb. 20c; lb. 35c; 2 lb. 65c, postpaid.

Improved Adams Early

A Popular Sort for Roasting Ears

While not a sweet corn, this is a tender corn often used for the table, particularly in the South. The ears are about 8 inches long, 12 to 14-rowed, and the kernels are white, somewhat deeper than broad and indented at the outer end. The stalks are about 6 feet high. Can be planted earlier than any Sweet Corn. Pkt. 6c; ½ lb. 15c; lb. 25c; 2 lb. 45c, postpaid.

Best of All

The Largest Eared Sugar Corn. Early, Prolific, Sweet, Tender, Large, Handsome

"Best of All" is of exceptionally stocky growth and an abundant and satisfactory yield; ears of large size; kernels very broad and especially sweet, rich, white and tender. Not only is it valuable for family use, but for early market and shipping purposes it is also in the lead. And we can highly recommend it for all general purposes. Pkt. 8c; ½ lb. 20c; lb. 35c; 2 lbs. 65c, postpaid.

New Golden Sunshine

The 12 Rowed Golden Bantam. Early—Sweet—Prolific Good Size

This new Sweet Corn is a wonderful improvement over the popular Golden Bantam, as it is larger, sweeter, has 12 rows instead of 8 and is from 10 days to two weeks earlier. The flavor leaves nothing to be desired, as it is rich and sweet and never becomes tough and woody. There is a great demand for this variety and we were entirely sold out early last year, so order early if you desire one of the finest Sweet Corns you ever tasted. Pkt. 10c; ½ lb. 17c; lb. 30c; 2 lb. 55c, postpaid.

Black Mexican

Delicious Sweetness. Cooks Clear White

This corn, when very young, cooks remarkably white, but the ripe grain is bluish black. For home use we consider it the best second early sort where tenderness and sweetness are the qualities most desired. It does especially well as a second early variety in the South. The stalks are about 6½ feet high. The ears are about 8 inches long and are usually eight rowed. Pkt. 8c; ½ lb. 17c; lb. 30c; 2 lb. 55c, postpaid.

New Early Sunrise

Absolutely the Earliest Good Sweet Corn. The beauty and quality of this remarkable variety give it prominence over all others for family, market, canning, shipping, and, in fact, all purposes. Ears large, grains of great depth, exceedingly tender and sweet. Our seed stock is carefully grown and selected with the sole object of keeping it up to the highest standard of excellence as the earliest, largest and best on record. Country Gentleman

This variety is often called the "Shoe Peg" Corn, owing to the arrangement of the crowded kernels, which are long and very sweet. Considered by many the best of the late varieties, as it remains tender and fit for use longer than most sorts, as the ear is enclosed in a thick husk, which keeps it "in the milk." Slender, very deep, white, very tender and lusciously sweet. Pkt. 8c; ½ lb. 18c; lb. 32c; 2 lbs. 60c, postpaid.

Private Stock Evergreen

Acknowledged the Best Standard Late Sweet Corn. Very tender, sugary, and remains a long time in condition suitable for cooking; coming into the market at a time when the main crops are being sold, these are very important conditions. For canning purposes Private Stock Evergreen Sweet Corn will prove most satisfactory; its large ears, with long slender grains, make by far the most salable canned corn, and it out-yields all other varieties. Many of our customers who made trials of this splendid Sweet Corn the past year, report yields of over 200 bushels of ears per acre. Pkt. 8c; ½ lb. 20c; lb. 35c; 2 lbs. 65c, postpaid.

The Sweetest Flavored Melon Known—The Best Variety for the Table—
For Shipping and Long Keeping

In hundreds of markets every season it finds ready sale at good prices when all other sorts go begging for buyers. This grandest of all varieties has been extensively grown the past few seasons in almost every melon growing locality of the world, and in not one single instance has it failed to meet the expectations of the planter. The reports received from every section, that all are delighted with it, prove that in the hands of our customers Monte Cristo has given the same surpassing results as in our careful trials on Rockford Seed Farms.

The greatest yielder and the sweetest, juiciest, crispest and most solid Melon ever produced, never having a hollow or pithy center when ripe. The easiest to sell on the market, for when once tried, people will have no other. Many of our customers have written us, that they have cleared \$100 or more per acre by growing Monte Cristo Melons. Under average cultivation you can do as well or better. Will you not try it this year? This is an early variety, ripening about a week or ten days later than the extra early kinds offered in this book. It is a grand, good shipper, has a firm, solid rind, not too thick, yet will stand the most severe handling. The outside skin is of a rich, dark green color, shaded with faint stripes of a somewhat lighter color. Certainly the finest appearing Melon ever grown for market, shipping or table purposes. While our supply of seed is fairly large, we always have advance orders from our customers, who have planted Monte Cristo in past seasons and we would advise all who care to plant this "King of Melons" to place their orders as early as possible. Please remember that we control the entire product of this variety, choicest stock seed of Monte Cristo Melon. Seeds are bred for disease resistant qualities. The price is within the reach of all.

Prizetaker

Beautiful Color—Ideal Size—Uniform Shape—Exceptionally Good Keeper—Wonderful Flavor—Always at Its Best.

Unexcelled for Home Use or the Market.

Genuine Prizetaker Onion has proved itself to be one of the handsomest and most productive large Yellow Globe Onions which are grown extensively today. It grows as easily as any other sort, and can be used for all purposes—the young plants as salad, the half-grown bulbs in early summer, and the perfect mature Onion practically at all times, for it keeps so well that it may be used almost the year around. It is esteemed not only in America, but in foreign countries. Soon after its introduction it was exhibited in London, and in the keenest competition with the products of the most skillful growers, earned an "Award of Merit" from the Royal Horticultural Society of England. Not only does it grow to a large size, but uniformly so. The shape is true globe, broad at the base, tapering sharply at the top. It is so well bred that the tops dry down entirely when it ripens, leaving a clean, sound bulb, perfect in form, rich in color, and wonderfully solid. The outer skin is rather pale yellow, the flesh pure white throughout. It is extremely mild in flavor, very much esteemed for slicing, baking and boiling; in fact, in whatever way it is prepared, it is unsurpassed. Pkt. 10c; oz. 20c; 2 oz. 35c; ¼ lb. 65c; ½ lb. \$1.20; lb. \$2.00; 2 lbs. \$3.50, postpaid.

New Denia

New Denia

Large, Productive, Sweet, Attractive, Mild Flavor. Sometimes Called an Improved Prizetaker But It Would Take Two Prizetakers to Make One Denia.

The New Denia is a wonderful onion, of beautiful color, uniform shape, heavy weight and sweet, mild flavor. With the exception of New Sweet Spanish, this is the heaviest onion ever grown. Very handsome and productive, of perfect globe shape which always comes very uniform. Color bright, clear, straw yellow. Have very little neck, but ripen up firm and solid. A wonderfully good keeper for so early a variety. Flesh is pure white, very fine grain and so sweet that it makes a splendid sort to use in salads and other ways without cooking. Equally desirable for the home garden or for one who grows for the market. Send to us for choicest stock seed. Pkt. 10c; oz. 25c; 2 oz. 40c; ¼ lb. 65c; ½ lb. \$1.20; lb. \$2.25; 2 lbs. \$4.25, postpaid.

Pedigree Large Red Wethersfield

Deep Purplish Red Color. Mild, Good Size, Flat. The bulbs are large, flattened, but quite thick, with rich dark purplish skin and pure white flesh of good mild flavor. Our stock is saved from carefully selected bulbs only, and produces larger crops than any other American red onion and these bulbs keep better than those of any other sort. Our strain of Red Wethersfield is the earliest and most prolific known, and has proven a great money-maker to the grower. Pkt. 10c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.10; lb. \$2.00; 2 lbs. \$3.75, postpaid.

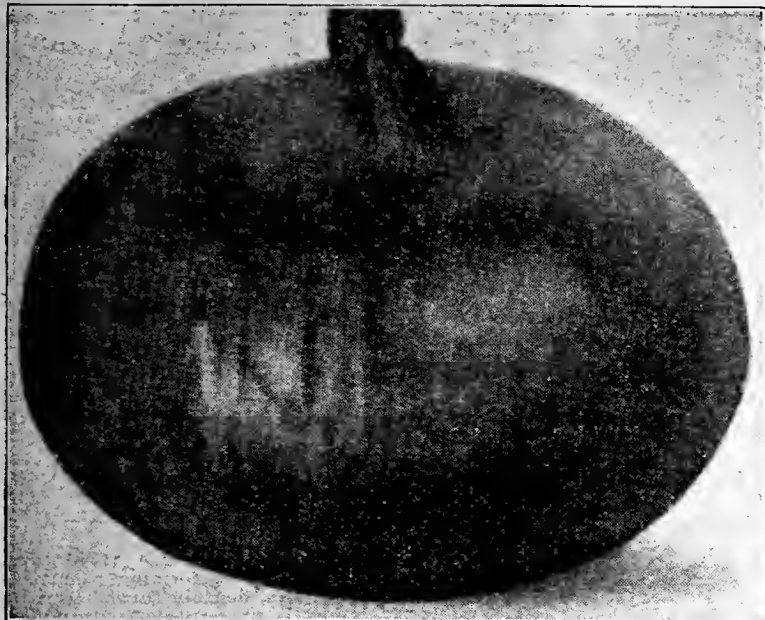

Golden Sweet Spanish Onion

Color is a light yellow or straw color, the flesh pure white of very fine grain and exceptionally sweet. As Denia is nearly twice the size of Prizetaker, so is our new Sweet Spanish twice the size of Denia. We have seen 7 Sweet Spanish Onions set side by side on a yardstick and reach from end to end. These same 7 Onions weighed over 16 lbs. An exceptionally good keeper, and if allowed to dry thoroughly, will stand shipping long distances. The size, however, is not the best feature—it is its sweet mild flavor. Pkt. 15c; oz. 30c; 2 oz. 55c; ¼ lb. 90c; ½ lb. \$1.60; lb. \$3.00; 2 lbs. \$5.50, postpaid.

ONION SEED—Continued

New Golden Globe Danvers

Long Keeper, Best Shipper, Unrivaled Market Onion. Always in the Lead, Challenges Competition

A most perfect type of the globe-shaped Onion and an extra early variety. It has a very small neck, the entire crop drying down at one time. The bulbs are of a beautiful golden yellow color. Trial tests have shown this great variety to yield over 2,000 bushels per acre while under ordinary cultivation in past seasons several of our customers have reported yields of 1,000 bushels per acre. The bulbs are very hard, solid and are exceptionally good keepers.

Remember that we control the entire supply of this variety. Our own growth, choicest Northern grown, high-grade pedigreed stock seed. Pkt. 8c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.10; lb. \$2.00, 2 lbs. \$3.75, postpaid.

Australian Brown

This sort is distinct from all other Onions. Is uniform in size and shape, wonderfully hard, solid and heavy, and will keep almost indefinitely. Ripens extremely early and never makes scallions. It is of medium size, round, with skin of a deep amber-brown; flesh white, mild and agreeable. A sure cropper. Pkt. 7c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 85c; lb. \$1.60; 2 lb. \$3.00, postpaid.

Mammoth Silver King

The King of White Onions—Its Mildness of Flavor and Tenderness Are Unsurpassed

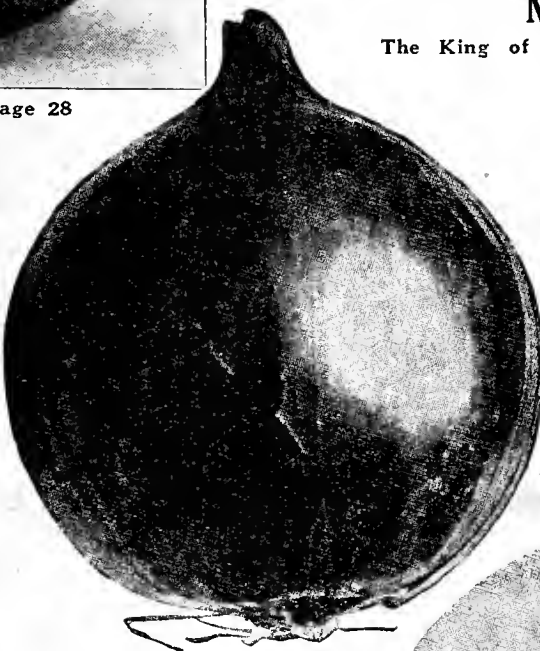

The largest white Onion. Grows to a remarkable size—average diameter is from 5 to 7½ inches. Single bulbs often attain weights of over 4 pounds each. There is no other white Onion which attains such mammoth size. The shape is flattened, but thick through. The skin is of a beautiful silvery white. The flesh is of a snowy white and is of a particularly mild and pleasant flavor. Being a sure cropper, producing immense Onions and enormous crops which bring the highest prices, this variety has been a great money-maker for the grower; but its fine, mild flavor makes it also most desirable for the private gardener. Send to our Rockford Seed Farms for tested pedigreed seed. Pkt. 10c; oz. 25c; 2 oz. 40c; ¼ lb. 65c; ½ lb. \$1.30; lb. \$2.25; 2 lbs. \$4.25, postpaid.

New White Portugal or White Silverskin

The Standard White Onion for Market and Family Use

Medium size bulbs of flat shape, which ripen evenly and quite early—about 10 days earlier than Southport White Globe. They are of handsome appearance; have a clear white skin as beautiful as glistening silver. The flesh is of mild, delicious flavor. For keeping, this is the best of all white varieties.

A gardener who does not care to plant more than one variety should use this one, and everyone should make a liberal sowing of it for continuous use. These Onions make fine bunching of Green Onions and are also grown for the market as large White Onions. They are also much used for pickling and for Onion Sets. Buy your seeds from first hands. Our own growth, choicest Northern-grown, high-grade pedigreed stock seed. Pkt. 7c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; ½ lb. \$1.10; lb. \$2.00; 2 lb. \$3.70, postpaid.

Pkt. 7c; oz. 15c; 2 oz. 25c; ¼ lb. 45c; ½ lb. 85c; lb. \$1.60; 2 lb. \$3.00, postpaid.

Selected Yellow Globe Danvers

Our strain of Yellow Globe Danvers, developed by careful selection and breeding, is pedigreed stock of the highest type, far superior to the seed mostly offered by others. This stock produces bulbs of fine symmetrical shape, large size, average specimens weighing from 1 to 2 lbs. each. These bulbs have small necks and ripen evenly. The skin is a light golden brown; the flesh is finely grained, pure white, crisp, mild and of excellent flavor. It is a grand, magnificent keeper and shipper. Frequently produces 800 bushels or more to the acre from seed. About a week earlier, but not quite so large nor so perfectly globe-shaped as Southport Yellow Globe. Our own growth, choicest Northern-grown, high-grade, pedigreed stock seed. Pkt. 8c; oz. 20c; 2 oz. 30c; ¼ lb. 50c; ½ lb. 95c; lb. \$1.75; 2 lbs. \$3.25, postpaid.

White Pickling

This distinct variety is the very earliest Onion in cultivation. Of a pure paper-white color, very mild and delicate in flavor; from 1 to 1½ inches in diameter and ¾ of an inch in thickness. Its extreme earliness makes it very valuable for early table use as well as bunch Onions for market. Pedigreed stock seed. Pkt. 10c; oz. 25c; 2 oz. 40c; ¼ lb. 65c; ½ lb. \$1.20; 1 lb. \$2.25; 2 lbs. \$4.25, postpaid.

Early White Welsh

For Green Onions. A most desirable green bunch Onion. It does not form bulbs, only enlargements at the base of each shoot, which are quite attractive and, being extremely early sell well before Onions grown from sets are brought to the market. We recommend this variety very much and know market gardeners will find it an exceedingly profitable crop. A hardy perennial and can remain in the ground for years. Pkt. 10c; oz. 20c; 2 oz. 38c; ¼ lb. 70c; ½ lb. \$1.25; lb. \$2.40; 2 lbs. \$4.70.

Egyptian or Perennial Tree Winter Sets

This variety never forms a large bulb. Its value lies wholly in its special adaptability to produce green Onions for Spring or Fall uses. It is perfectly hardy, and when once set out will come up year after year. Should be planted in the Spring. We also supply these sets for shipment September 1. This variety increases by producing sets at the top of the stalk and does not produce seed. Postpaid, ½ lb. 18c; lb. 30c.

Bottom Onion Sets

Bottom Onion sets produce an Onion ready for market or the household from 4 to 6 weeks earlier than can be done by sowing the seed, and the product of the set is identical with that of the seeds. This gives the market gardener ample time to sell his entire crop at the early high prices and permits the sowing of another crop on the land the same year. Every private garden should contain a sowing of sets.

PARSNIPS

On favorable soil it yields an immense crop of roots, more nutritious than turnips and very valuable for dairy stock. Parsnips are usually grown on deep, rich, sandy soil, but will make good roots on any soil which is deep, mellow and moderately rich. Fresh manure is apt to make the roots coarse and ill shaped. As the seed is sometimes slow and uneven in growth, it should be sown as early as possible in drills 2½ feet apart; cover ½ inch deep and press the soil firmly over the seed. Give frequent cultivation and thin the plants to 6 inches apart in the row.

New Sugar

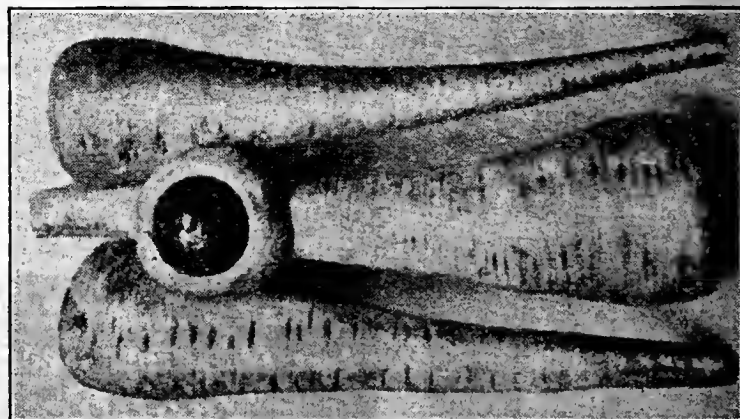

The best Parsnip grown. Roots fine size, of good diameter, enabling them to be easily gathered; are exceedingly smooth; the flesh fine grained and of the most excellent quality. A magnificent cropper, yielding as high as 750 bushels per acre under good cultivation. You will not be disappointed by planting NEW SUGAR PARSNIP. Potlatch or Big Dinner

The Best Main Crop Variety of Large Podded Dwarf Peas

Potlatch is Chinook Indian for Big Dinner. The vines are sturdy and vigorous, growing about 20 inches high, with coarse and unusually dark green foliage which can be distinguished from that of other peas a quarter of a mile away. The pods, which are borne in pairs, are long, often measuring 6 inches or more. They are broad, pointed, rich dark green in color and in size and fullness fully equal to those of the Tall Telephone Pea. They contain 9 to 11 Peas, which are very large and in sweetness and flavor rank with the finest. Potlatch is a wonder of productiveness and the way the Peas shell out is astonishing. On account of its large, beautiful pods and enormous productiveness, is a great favorite with market gardeners, and owing to delicious quality one of the best for the table. Potlatch is a second early, dwarf, very large podded Pea; it has become the leading and most popular variety of its class. 2 oz. Pkt. 8c; 1/2 lb. 25c; lb. 40c; 2 lbs. 70c, postpaid.

New Early Gradus or Prosperity

The Earliest, Largest Podded Wrinkled Pea

This popular Pea matures only two or three days later than the small-podded, round-seeded Extra Earlies, but has pods as large as those of the Telephone Pea and is fully equal to it in quality. Gradus is probably the most popular of all the extra early wrinkled Peas. It has taken the place of the smooth early Peas to a great extent. It grows from 3 to 3 1/2 feet high, requiring no sticks or brush, but sticks may be used if preferred. The Vines are of pale green color and bear in great profusion from top to bottom immense round, dark green pods, 4 1/2 to 5 inches long, well filled with from 8 to 10 or more Peas of delicious quality as large and as rich in flavor as the Telephone Peas, and these Peas can be had only a few days later than the small extra early Peas. These Peas retain their color and attractive appearance after cooking. Gradus is adapted to all purposes of the market gardener and does equally well in the home garden. 2 oz. Pkt. 10c; 1/2 lb. 22c; lb. 40c; 2 lbs. 70c, postpaid.

Thomas Laxton

Extra Early Large Podded Sweet Wrinkled Pea

The rival to the famous Gradus—as a long-podded, extremely early wrinkled Pea. The growth is identical but the pods are deeper, richer green, square at the end and contain more Peas. In the opinion of some experts, Thomas Laxton is even sweeter and finer in flavor, while as the large Peas are of a deeper green, they present a more attractive appearance on the table. The crop ripens only 3 to 4 days after Gradus. A splendid market gardener sort, but especially recommended for the home garden. 2 oz. Pkt. 8c; 1/2 lb. 20c; lb. 35c; 2 lbs. 65c, postpaid.

Sutton's Excelsior

Pkt. 8c; 1/2 lb. 20c; lb. 35c; 2 lbs. 65c, postpaid.

Laxton's New Progress

Dwarf, Early. Large and Delicious. The Finest Pea Ever Grown

This new Pea is without question the very finest of the large podded dwarf, early Peas. Of the same type as Giant Laxtonian, this Pea will mature several days earlier and produce a much heavier crop. Vines are dwarf, only 15 to 18 inches high, and the pods, which are rich dark green are 4 1/2 inches long and always crowded with large dark green Peas of finest quality. We believe this is the earliest large podded dwarf Pea, and just what we have all been waiting for. 2 oz. Pkt. 10c; 1/2 lb. 25c; lb. 40c; 2 lb. 75c, postpaid.

Improved Stratagem

New Everbearing

The Great Continuous Everbearing Variety

Vine stout, about two and one-half feet high, bearing at the top six to ten broad pods. If these are picked as they mature and the season and soil are favorable, the plant will throw out branches bearing pods which will mature in succession, thus prolonging the season. The Peas are very large and wrinkled, cook very quickly, are tender, of superior flavor and preferred by many to any other sort. 2 oz. pkt. 8c; ½ lb. 20c; lb. 35c; 2 lbs. 65c, postpaid.

New Vigorosa

The Most Magnificent Of All New Productions. Nothing Like It For A Second Early Pea Has Ever Been Produced. It Requires No Support. There Is No Pea More Prolific. It Is A Leader In The Market And In Demand Among Epicures. To Try It Is To Surely Succeed.

This grand, exceptionally good, new Pea is beyond all reasonable doubt by long odds the very best Second Early variety that has ever been introduced. The extended history of Pea culture gives us no example of a production anything near the equal of Vigorosa. It is absolutely unparalleled. No bushing at all is required. The vines grow to be but 20 inches tall and are so stout they bear immense crops without failing. As an enormous yielder the New Vigorosa ranks first, and has no close rival. When it comes to quality—well, that is one of its many strong points. No one who knows the merits of real Peas could possibly find fault with it. It pleases critical judges, which means it is all that we claim for it. Those of our customers who have tried it say it is better than we represent it to be. 2 oz. pkt. 10c; ½ lb. 23c; 1 lb. 40c; 2 lb. 70c, postpaid.

Grant's Favorite

The Ideal Home Garden Pea. Tall Vines, Large Pods; Luscious Peas Which Are Rich and Finely Flavored

The Peas are almost double the size of any other early dwarf Pea, are wrinkled, of bluish-green color, and have the true rich marrow flavor, tenderness and quality of the best main crop varieties. Its great earliness, the very large size and dark green color of the pods commends this variety particularly for market gardeners' use, while the unsurpassed quality makes it especially desirable for the table. 2 oz. pkt. 8c; ½ lb. 22c; lb. 40c; 2 lbs. 70c, postpaid.

Mammoth Podded Sugar Marrowfat

Extremely prolific, outyielding any known sort. Pods are 3 to 4 inches long, completely filled with large peas of good flavor. Vines grow about 4 feet high; should be bushed for best results. Uniformly in type, large pods and the fine, cool looking, rich, green color of the pods, give them the highest marketable value in appearance, which is retained several days longer than pods of lighter color. 2 oz. pkt. 8c; ½ lb. 18c; lb. 33c; 2 lbs. 60c, postpaid.

PEANUTS

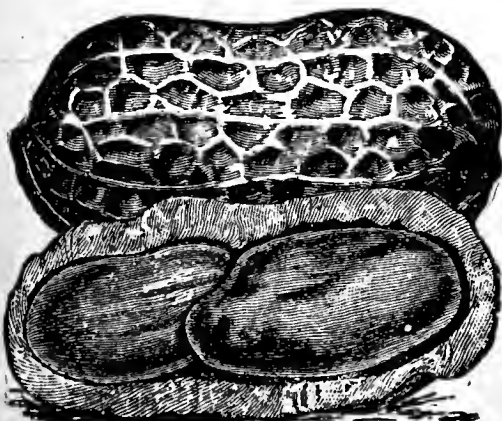

Our Peanuts Are Grown for Seed Purposes Only and Are the Finest That Can Be Grown.

Peanuts have always been an important farm crop in this country; millions of acres have been planted with them in the southern states, but now that their great value for producing oil and oil-cake is being better realized, a much larger acreage will be grown with them. Last year about a hundred million bushels of Peanuts have been ground up by oil mills for oil and oil-cake, while a few years ago none had been used. A ton of Peanuts in pods produces 80 gallons of sweet oil and also 750 pounds of feeding cake. This oil and cake are superior to that from cotton seed. Peanut oil is fully equal to olive oil and Peanut meal makes hard hog-flesh. The Peanut Family contain a larger percentage of oil than the other legumes and are wanted by the oil mills who now pay a higher price for a bushel of them than for cotton seed. In the South, especially on a sandy land, Peanuts will supplant cotton as a money crop, being more profitable. The cultivation of this crop is also every year extending farther north, and on suitable soil in the northern states Peanuts will make a profitable crop for stock feed where Indian Corn thrives and with a season of only four months free from frost.

Plant in rows 2½ to 3 feet apart and 6 to 8 inches apart in the rows. The Seed Peanuts are planted either shelled or in pods, using 1½ peck of shelled or 2 bushels in pods per acre. The pods may also be broken in 2 parts, soaked in water and then planted at once. The larger varieties are mostly planted shelled at the rate of ½ bushel per acre. Planting must not be done until the weather is warm. Cultivate until they begin to form pods. When they mature pull them up, turning the roots to the sun. In bright weather they will be cured in 24 hours. They must be pulled before frost.

New Mammoth Virginia

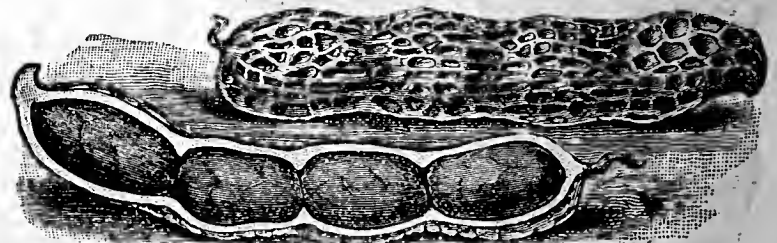

This Mammoth Virginia Peanut is more profitable and desirable than the common spreading kind, because more productive, earlier, yields fewer imperfect pods and is more easily cultivated and harvested, having very erect stems and upright foliage. The vines make valuable

New Mammoth Bush Peanut

Spanish Peanut

forage for stock. Will ripen even as far north as Canada. Hundreds of our young friends reported a wonderful crop the past season. The standard variety for roasting. Postpaid, pkt. 8c; ¼ lb. 15c; ½ lb. 25c; lb. 35c; 2 lbs. 65c; 5 lbs. \$1.30. By Express, not prepaid, 5 lbs. \$1.00; 10 lbs. \$1.90.

New Early Long Pod Bush

Originated by one of the best Peanut growers in the South and is certainly a distinct improvement in appearance over any Southern variety now in use. Will do well on most all kinds of soil, and fill out better than any other large variety. Can be pulled up with the vine same as the old Spanish Peanuts. The distinct long pods grow close and are well filled, containing 3 to 4 nuts to each pod. Very productive and of a mild, sweet flavor. Well adapted for stock feeding. Postpaid, pkt. 8c; ¼ lb. 15c; ½ lb. 25c; lb. 35c; 2 lbs. 65c; 5 lbs. \$1.30. By Express, not prepaid, 5 lbs. \$1.00; 10 lbs. \$1.90.

New Dixie Giant

The Jumbo of the Peanut family; owing to its extremely large size and handsome appearance is very desirable in every market, always bringing fancy prices. Plants grow about 18 inches high, with heavy, erect stalks and large leaves, fruits near the tap root. Can be planted close together, thus producing a large yield, and are more easily cultivated than the running varieties. The pods fill out well, forming few, if any pops. Should yield a gallon of nuts to one kernel planted. Postpaid, Pkt. 8c; ¼ lb. 15c; ½ lb. 25c; lb. 35c; 2 lbs. 65c; 5 lbs. \$1.30. By Express, not prepaid, 5 lbs. \$1.00; 10 lbs. \$1.90.

Spanish Peanut

The earliest variety grown; maturing in about 100 days; in some parts of the South two crops are raised in a year. Plants upright, with abundant and heavy foliage; the pods cluster at their base. Pods are small but well filled with nuts of sweeter and finer flavor than the larger sorts. The yield is on an average from 50 to 60 bushels of nuts and a ton of hay per acre, but frequently 100 bushels of nuts have been harvested. Can be cultivated with the plow. Because of its earliness, easy cultivation and great productiveness it is the best variety for farm use, for fattening hogs and other stock. In harvesting, the nuts hang to the vine and tops and nuts are fed together as a complete hay and grain ration. This variety has also a commercial value over that for feeding; it is the kind mostly used for Peanut candy and salted Peanuts and is also the best for oil, containing 10 per cent more oil than others. Postpaid, pkt. 8c; ¼ lb. 15c; ½ lb. 25c; lb. 35c; 2 lbs. 65c; 5 lbs. \$1.30. By Express, not prepaid, 5 lbs. \$1.00; 10 lbs. \$1.90.

Edw. J. Messinger, 695 Columbus Ave., Phillipsburg, N. J. —I have never grown a finer radish than the "Fiery Star" in size, taste and general goodness. My neighbors have enjoyed the radishes also.

RADISHES

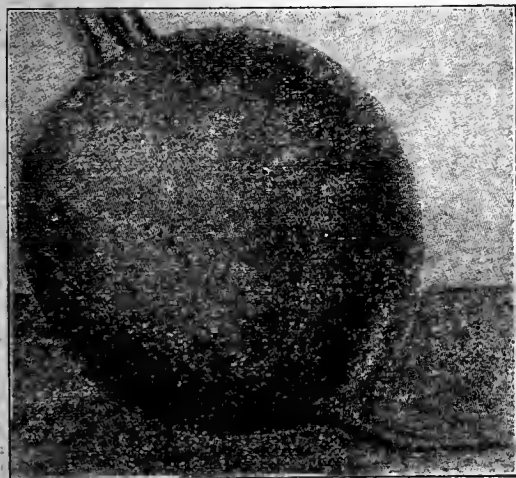

One ounce will plant 100 ft. of row. Sow 10 to 12 lbs. seed to an acre

To have good crisp, juicy Radishes your land must be carefully prepared so that you can grow them quickly; radishes cannot be grown in heavy soil, but require a warm sandy soil made rich and light through the use of good well rotted stable manure. Plant in rows 6 inches apart, and as soon as the plants are up thin them out so as to prevent crowding. Sow seed of early Radishes in April; of summer varieties in May and winter sorts about June 15.

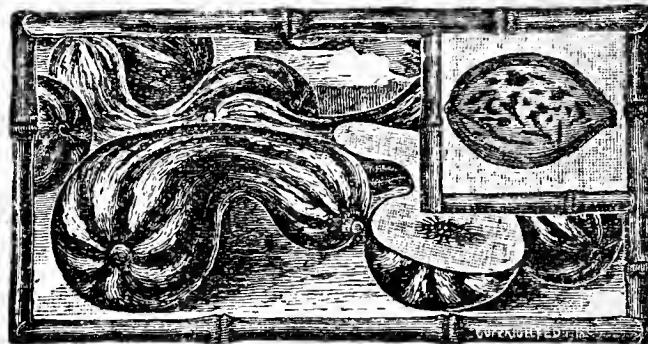

Crimson Giant Globe

Sweet, Crisp, Juicy, Mild, Wonderful Yielder—Beautiful Color—Large Size

Our Crimson Giant Globe Radish is one of our leading specialties, and many of our gardener friends who grow for market look forward for large quantities every season. See page 3 of this book for prices in quantity. This Radish is an entirely new type and differs radically from all varieties hitherto in cultivation, insofar as its roots attain more than double the size of other round, early varieties, without getting pithy or hollow. It is very early, notwithstanding its size. Color crimson, flesh pure white, of the best quality. The roots often weigh 1½ ounces each and are crisp and juicy. Fine for outdoors and forcing. The seed should be sown very thinly to permit full development of the roots. Pkt. 8c; oz. 12c; 2 oz. 20c; ¼ lb. 30c; ½ lb. 50c; lb. 85c; 2 lbs. \$1.55, postpaid.

Seeds are Bred for Disease-Resistant Qualities

New 50-Day Tomato

The Largest Fruited, the Smoothest, the Finest in Quality of all Extra Early Scarlet Tomatoes

Originated on our Rockford Seed Farms. Called 50-Day Tomato because it produces large, ripe fruits on strong plants in 50 days from time they are set in the open ground.

The vines are short, very vigorous, enormously productive and ripen a very much larger crop at the early part of the fruiting season than any other extra early variety. The fruits are globular, always entirely free from cripples, wrinkled or cracked fruits, and weigh on an average about 5 oz. each, although many fruits as heavy as 6½ oz. each and over have been found in our fields. The color of the fruits is a beautiful bright scarlet. They ripen evenly, well up to the stem, have no hard core, small seed-cells, and are practically all heavy, solid meat of mild and most delicious sweet flavor. The skin is thin, but very tough, making it a splendid long-shipping variety.

Compared with Earliana, 50-Day is a much heavier cropper and its fruits of much larger size, smoother, of better quality, containing less seed and more meat. They are of better appearance and therefore better sellers; furthermore, they ripen practically as early. Fifty-Day will soon replace Earliana, and

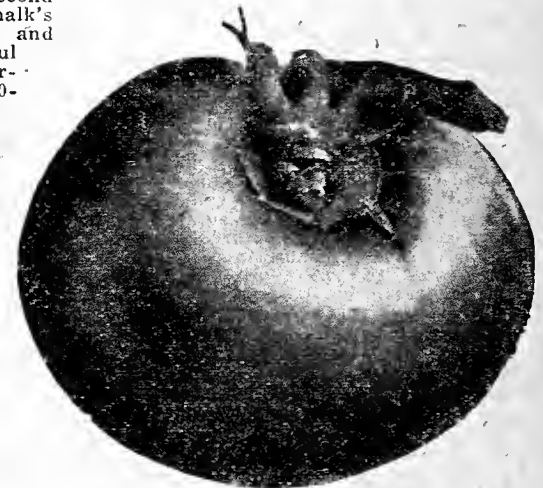

should also be planted in place of second early sorts like Bonny Best and Chalk's Jewel, being earlier, more productive and producing fruits fully equal in size, beautiful appearance and of better quality; only Earliest Market is a few days earlier than 50-Day, but has somewhat smaller fruit. Price, Pkt. 10c; oz. 50c; 2 oz. 90c; ¼ lb. \$1.50; ½ lb. \$2.60; lb. \$4.75, postpaid.

New Earliana

Pedigreed Strain.

An Extremely Early, Smooth, Bright Red Tomato of Good Size and Flavor.

Is among the very first ready for the market, and not only remarkable for its earliness, but for its very large size, handsome shape and bright color. The vines are small but vigorous and very productive, bearing the fruits in clusters near the base of the plant. The fruits grow about 3 inches in diameter, have solid thick flesh of splendid quality and are excellent shippers. Send to us for the earliest strain. Pkt. 8c; oz. 30c; 2 oz. 55c; ¼ lb. 85c; ½ lb. \$1.60; lb. \$3.00.

New Earliana

New 50-Day

The New Stone

Improved Strain. Large and Solid; Smooth and Uniform in Growth.

Late, enormously productive with very large, very deep solid and very smooth fruits of splendid shape and finest quality. Unsurpassed for slicing and canning. The vines are large, vigorous and very productive. Improved Strain of this old and valuable variety is the finest on the market, being larger, smoother, more uniform in size and shape and of brighter color than that offered by others. Pkt. 7c; oz. 25c; 2 oz. 40c; ¼ lb. 65c; ½ lb. \$1.20; lb. \$2.25, postpaid.

New Hearts of Fire Tomato

This Grand New Tomato Is as Nearly Perfect as Any We Have Ever Seen. Fruits Are of Uniform Size, Heavy, Solid, Attractive, Sweet, Smooth, and of Unequalled Flavor

Too much praise cannot be given this Tomato, as it is in a class by itself, being equally desirable for any use for which Tomatoes are grown. Its perfect shape and color commend it to the market; its size, quality and flavor make one of the best for all table uses, and its earliness, solidity and productiveness make it valuable for the canner. It is surely a wonder Tomato, and can be used for market canning or home garden. The vines are strong growers, but not rampant enough to decrease the yield of the fruits. On the contrary this New Tomato is one of the heaviest yielders we have. The fruits are large, often weighing a pound or more and are perfectly smooth and seldom crack. Color is a rich, bright crimson and penetrates clear through the fruit. There are few seeds, making nearly solid flesh. Shape is well shown by illustration. Matures very early for such a large variety and continues to bear its large, solid, smooth, finely shaped fruits until the plants are killed by frosts. We control the entire stock of this Tomato. Pkt. 15c; ½ oz. 25c; oz. 40c; 2 oz. 70c; ¼ lb. \$1.30; ½ lb. \$2.40; lb. \$4.50, postpaid.

New Ox Heart

Large Pinkish Purple Fruits Often Weighing A Pound or More. Fruit Very Solid and of Fine Quality. Matures in 105 Days

Being almost seedless the flesh of Ox Heart grows nearly two inches thick, without a seed cavity, making it ideal for salads and for slicing. The flavor and quality is unequalled. Although not a very heavy yielder, market gardeners will find it a profitable variety to grow, as their attractive appearance, assure their ready sale. Fruits grow in clusters of from 3 to 5. Because of its attractively different shape, large size and good keeping qualities, it is fast becoming a favorite everywhere. The weight is heavy, 1½ pounds being very usual, while 3 pound fruits are nothing uncommon, and 5 pound fruits have been seen. The Ox Heart shape can be depended upon on all but the very heaviest specimens. Pkt. 15c; ½ oz. 45c; oz. 80c; 2 oz. \$1.50, ¼ lb. \$2.50; ½ lb. \$4.50, postpaid.

The Famous Wilt Proof

Large, Smooth, Solid Fruits of Rich Red Color. Matures in 85 Days

This wonderful wilt resistant Tomato is the result of efforts of the U. S. Department of Agriculture and Seed experts to produce a Tomato which would grow in sections affected with wilt and blight. This wonder Tomato should produce a crop on any land in any State in the Union. In size and shape very similar to the well known Stone, but will yield nearly twice as many Tomatoes as the bearing season is continuous. Fruits are very solid, firm, smooth and of fine flavor. Pkt. 10c; ½ oz. 25c; oz. 40c; 2 oz. 70c; ¼ lb. \$1.30, ½ lb. \$2.40, postpaid.

New Pritchard or Scarlet Topper

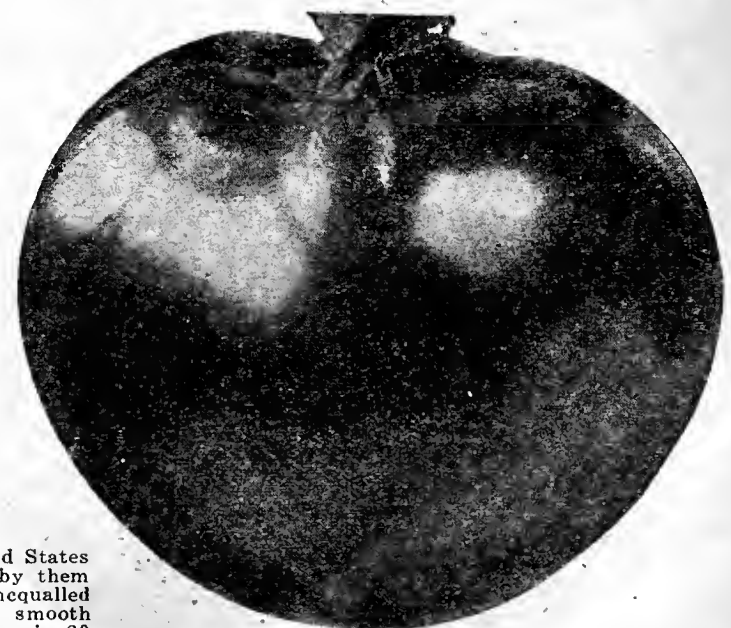

This wonderful new wilt resistant Tomato which was originated by the United States Department of Agriculture under the name of "Scarlet Topper" was renamed by them "The Pritchard" in honor of Dr. Pritchard to whom is due the credit for this unequalled variety. Main crop variety, heavy yielder of deep scarlet fruits of good size, smooth and unusual solidity. Without question the finest Tomato ever grown. Matures in 80 to 85 days. Pkt. 10c; ½ oz. 35c; oz. 55c; 2 oz. \$1.00; ¼ lb. \$1.75; ½ lb. \$3.25, postpaid.

Earliest Market

The Earliest Large Smooth, Scarlet Tomato in Existence. Indispensable to the Market Gardener. A Great Money-Making Tomato.

This variety bears fruit which in size, shape, color, solidity and quality compares favorably with the noted later kinds, and by repeated trials at Rockford Seed Farms and elsewhere has demonstrated that it ripens up a large portion of its crop the earliest of any variety. It is, without question, the earliest good, large scarlet Tomato. Gardeners and Tomato fanciers will readily see the advantage obtained over their competitors by growing Earliest Market. This is the variety which will give them the opportunity to be first on the market with a large crop of beautiful large fruits, selling readily at good prices.

Compared with the well-known Earliana, Earliest Market is about a week earlier, the fruits are fully as large, smoother, have no hard core, while Earliana is often rough and has large seed cavities. Furthermore, Earliest Market is much more prolific. An excellent kind also for the home gardens, and if you have not given this wonderful variety a trial, be sure to include it in your order for 1934. Pkt. 10c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.25; ½ lb. \$2.30; lb. \$4.25, postpaid.

NEW TOMATO

ABRAHAM LINCOLN

The Giant of all Tomatoes

THE NEW TOMATO—ABRAHAM LINCOLN—This world-beating Tomato was originated on Buckbee's Rockford Seed Farms and named in honor of Illinois' greatest son—Abraham Lincoln. This Giant of All Tomatoes was introduced by us in 1923 and is the largest Tomato ever grown. We have had 9 tomatoes in a single cluster with a total weight of 7 pounds; the average weight is about a pound and we have grown many weighing nearly 3 pounds. Beautiful dark red, attractive fruits, heavy, large, sweet, solid and meaty with very few seeds. For so large a tomato it is remarkably smooth and free from cracks and seams.

THIS NEW TOMATO—ABRAHAM LINCOLN—usually bears fruit in clusters of from four to six; the individual fruit, 5 to 7 inches in diameter, runs remarkably uniform in size and shape, being almost round, solid and weighs about one pound each, or heavier than any other tomato grown; the surface is very smooth and seldom cracks; the color, a rich blood-crimson, also permeates the flesh to the very heart; it ripens thoroughly, coloring up clear to the stem.

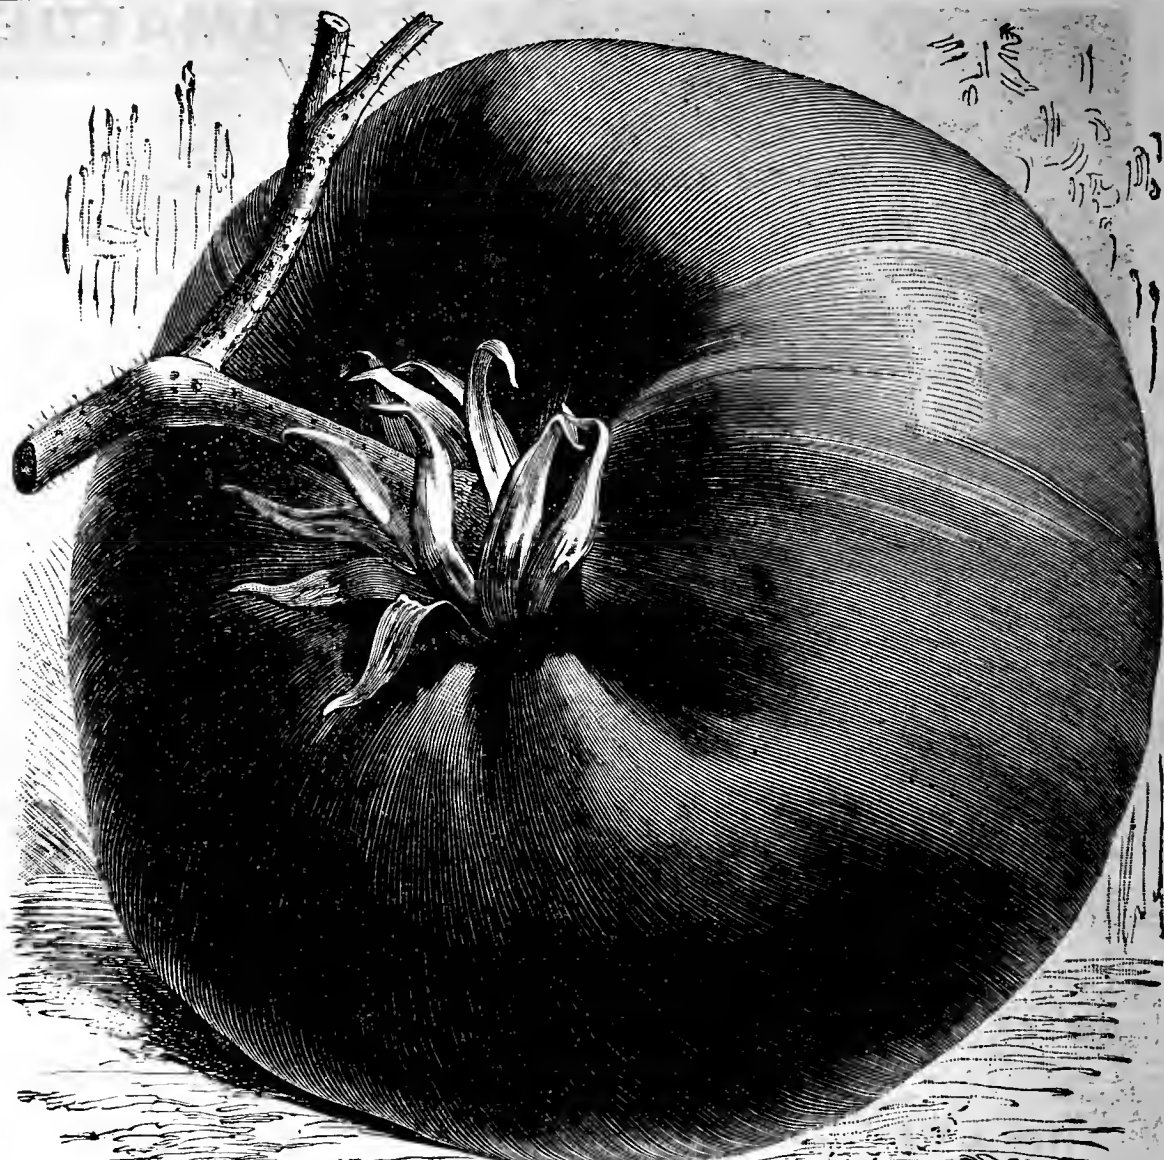

THE NEW TOMATO—ABRAHAM LINCOLN—possesses one crowning merit, the phenomenal solidity of the flesh. Even the seeds, which are small and few, are embedded in flesh of meaty firmness.

THE NEW TOMATO—ABRAHAM LINCOLN—has superlative merit; it is a sturdy, healthy grower with distinctive bronzy-green foliage; it ripens its first fruits immediately following those of the early sorts and from that time until frost it is practically ever-bearing, yielding enormous quantities of tomatoes, no other variety approaching it in productivity.

THE NEW TOMATO—ABRAHAM LINCOLN—on account of its solid character, splendid quality, rich red color of the flesh, and its appetizing appearance, is absolutely unsurpassed for slicing, salads and table use generally, while it is equally superior for baking, boiling and canning—the solidity of flesh and minimum of juice make thickening unnecessary.

THE NEW TOMATO—ABRAHAM LINCOLN—as a market variety, has already become very popular; its general merit and handsome appearance can not but attract buyers, and it is so solid that it "holds up" well when shipped, even though it does not have the thick, tough skin heretofore considered the most important requisite in a shipping tomato.

Seed of The New Tomato Abraham Lincoln can only be obtained from the originator, Rockford Seed Farms. Seeds are bred for disease resistant qualities. Pkt. of 150 seeds 20c; 3 pkts. 50c; ¼ oz. \$1.00; ½ oz. \$1.75; 1 oz. \$3.00, postpaid.

This is the largest of the yellow varieties in cultivation. The fruits are very uniform in shape and size, contain but little core and few seeds, and are a solid mass of succulent meat. Their skin is thin and they ripen the first fruit quite early, continuing to bear until frost. Pkt. 15c; ½ oz. 30c; oz. 50c; 2 oz. 85c; ¼ lb. \$1.50; ½ lb. \$2.75; 1 lb. \$5.00, postpaid.

TOMATOES—Continued

New Early June Pink

The Earliest Pink in Cultivation—Medium Size, Round, Smooth and Solid.

The earliest of the pink fruited Tomatoes, similar to the popular scarlet-fruited Earliana in growth of vine, shape and size of fruit and time of maturing. This is of exceptional value to market gardeners, who want an early, pink-fruited Tomato. The vines are compact and branch freely, bearing their handsome, good-sized deep pink fruits in large clusters continuously throughout the season until frost. It is very popular as a market and shipping variety and most desirable for the home garden. Our seed is superior to that commonly offered by others and will produce fruits earlier, larger, smoother, of better shape and color. Pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.10; ½ lb. \$2.10; lb. \$4.00, postpaid.

New John Baer—Pedigreed Strain

Fruits Are Large, Smooth, Firm and Solid, and Nearly Round. Extra Early and Continues for a Long Time.

An extra early Tomato, large, smooth, bright scarlet fruits of excellent quality. Short, vigorous vines, enormously productive. Fruits larger, smoother, with less seeds than those of Earliana, but somewhat later. For early crops the New John Baer Tomato is planted exclusively in many sections supplying large city markets. Plants are compact in growth, with short, close-jointed branches, setting fruits very freely in the center. Most valuable for the market gardener and very desirable for home use. Pkt. 8c; oz. 35c; 2 oz. 65c; ¼ lb. \$1.00; ½ lb. \$1.75; lb. \$3.25, postpaid.

New Tree Tomato

Firm, Solid Thick Flesh, Large Meaty Center

This grand Tomato owes its popularity to its stiff, vigorous, upright growth, with fruit well above the soil, and to the earliness with which it reaches its maturity. In color the fruit is purplish pink, form always round and symmetrical and of medium size. New Tree Tomato is immensely productive, clusters of four to six fruits being produced in abundance along the stem. All of the fruits grow to a marketable size. The table qualities are the best as this is a good slicing variety, the seed cells being surrounded by rich, heavy flesh. This feature also makes it desirable for canning. As a shipper it stands up remarkably well, arriving at its destination in fully as good condition as when it left the field. This wonderful Tomato leaves nothing more to be desired, as it is mild, pleasant and of delicious flavor. Being a strong, robust grower, it has a broad foliage which prevents sunburn in hot sections. Pkt. 10c; oz. 33c; 2 oz. 60c; ¼ lb. \$1.10; ½ lb. \$2.00; lb. \$3.75, postpaid.

In either place it is an excellent sort and worthy of extensive cultivation. Pkt. 10c; ½ oz. 28c; oz. 50c, postpaid.

SWEET ORONOKO—This variety is adapted to a wide range of soils and uses. It will make a good black, mahogany, or bright tobacco and can be either Flue, Air, Fire, or Sun cured. For home use there is nothing better in chewing tobaccos. The leaf is long, narrow and cures into a heavy rich product. Pkt. 10c; ½ oz. 28c; oz. 50c, postpaid.

VUELTA DE ABAJO—For those who wish an imported Havana tobacco, nothing finer than this can be found. It is the finest strain of cigar leaf grown in this country one year from imported seed. This gives it a stronger constitution, slightly larger leaf, but it still retains its rich gum and high flavor. Pkt. 10c; ½ oz. 28c; oz. 50c, postpaid.

Giant Ruta Baga

Garden Huckleberry

GARDEN HUCKLEBERRY

An Easy Growing Fruit of Wonderful Flavor

A wonderful, prolific plant needing the same culture as Tomatoes. When ripe, the berries are about one inch in diameter, of shining black color. They make delicious pies, preserves and jam. Fruit should not be used until fully ripened. The flavor is delicious, and after once you have tried the Garden Huckleberry, you will never want to be without. Plant seed direct to the open ground. Pkt. 10c; oz. 40c, postpaid.

MRS. CHAS. FENTON, Rogers, Ark.—We grew your Garden Huckleberry last year. Bushes were loaded with fruit until frost. From 30 plants I canned quarts and quarts, then gave my neighbors the balance, and they canned as many as I did.

THE SUNBERRY OR IMPROVED WONDERBERRY

THIS IS WITHOUT QUESTION LUTHER BURBANK'S GREATEST PRODUCTION; A LUSCIOUS BERRY THAT MAY BE GROWN AND RIPENED FROM SEED IN ANY SOIL OR CLIMATE IN THREE MONTHS.

Fruit more like a great, rich, luscious blueberry than anything else. Beautiful color, fine flavor and unsurpassed for eating raw, cooked, canned or preserved in any form. It is easily the greatest garden fruit ever introduced. Easiest plant in the world to grow. Succeeding anywhere and yielding great masses of rich fruit all Summer and Fall. THE QUALITY is sweet and delicious when fully ripe. Like the grape, it should have time to ripen well after coloring in full sun. Skin, which may seem a little tough in a raw state, cooks tender. Seeds small, one-quarter the size of Tomato seed, and cook soft, and are not noticeable. We offer this desirable garden delicacy in two distinct colors.

Burbank's Improved Wonderberry (the Original Blue Black Color), pkt. 12c; 2 pkts. 20c; oz. 40c, postpaid.

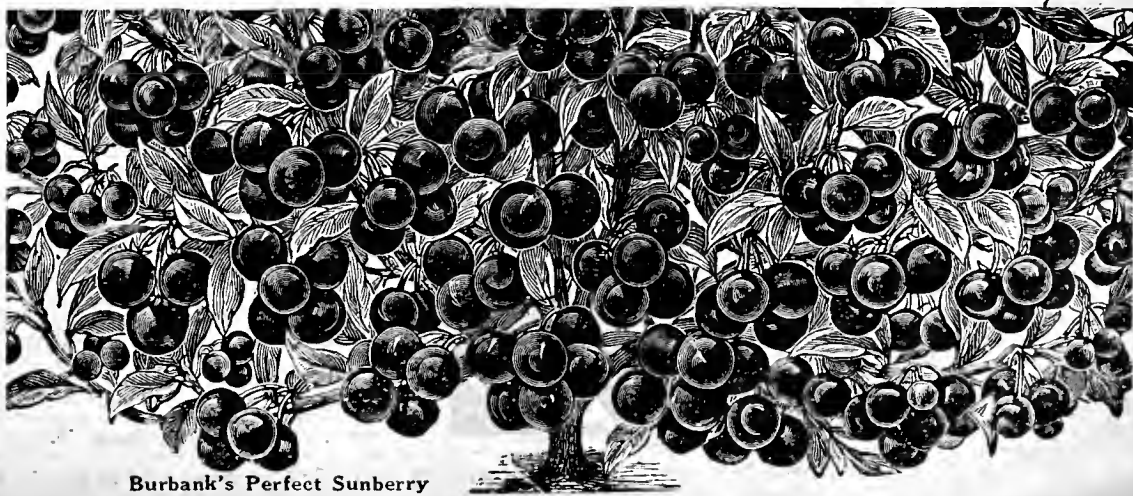

Burbank's Perfected Sunberry (the New Golden Color), pkt. 12c; 2 pkts. 20c; oz. 40c, postpaid.

How to Have a Beautiful Lawn

Our lawn grass seed produces a perfect and enduring lawn of luxuriant richness, with closely interwoven, firm, deep and elastic turf, is generally ready for mowing in six weeks from time of sowing and is composed of a thoroughly balanced combination of native and foreign fine-leaved, deep-rooting grasses of interweaving habit, that flourish under varied conditions, soils and climates, growing during different seasons of the year, so that a deep green, smooth and velvety sward free from clumps is maintained from snow to snow without burning brown in the hot months of summer. A lawn may be established either by "sodding" or "seeding." The latter is not only much less expensive but much more satisfactory, as better grasses can thus be obtained, and the quality and variety of the grasses have a great deal to do with appearance and the permanency of the lawn.

It is unrivaled for purity and luxuriance in growth and will give complete satisfaction wherever sown. With ordinary care, anyone can, by using this mixture, secure a beautiful lawn. Shady Place Lawn Grass Seed

THE VERY BEST OBTAINABLE—CAREFULLY BLENDED—YOU CAN
HAVE A BEAUTIFUL LAWN WITH VERY LITTLE WORK, BY
USING OUR WELL BALANCED MIXTURE

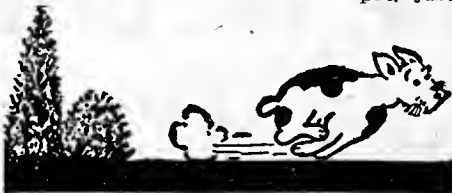

On nearly all lawns there are unsightly bare spots under the shade of trees, which have baffled all efforts to get into grass, but with this mixture there need be no further difficulty. It is a combination of fine dwarf-growing, evergreen varieties which in their wild or natural state are to be found growing in the woods or other sheltered and shaded spots. Ground that has been densely shaded by trees is frequently "sour" and if the drainage is defective it is apt to be covered with moss and coarse bog grasses. In such cases an application of slake lime, at the rate of one bushel to each thousand square feet, or 40 bushels to the acre, is an excellent corrective and sweener, but the moss should be first removed.

Price, postpaid, 1/2 lb. 30c; lb. 55c; 3 lbs. \$1.55. By express or freight, not prepaid, 5 lbs. \$2.40; 10 lbs. \$4.70; 15 lbs. \$6.90; 25 lbs. \$11.25.

Sheep Manure, Pulverized. One of the most generally used of animal manures. Unequaled for general use in growing flowers, and is also recommended for use on the lawn. 5 lbs., 40c; 10 lbs., 65c; 25 lbs., \$1.25; 50 lbs., \$2.00; 100 lbs., \$3.50; 500 lbs., \$16.50; 1000 lbs., \$30.00; ton, \$55.00. F. O. B. Rockford.

PEAT MOSS—No other material is quite its equal for soil conditioning. It is organic and is free of all weed seeds. As a mulch, especially for roses and perennials it has no equal. Sold in bales of approximately twenty bushels which will cover three hundred square feet one inch deep. Indispensable to the good gardener.

Combination Lawn and Garden Invigorator

The Marvelous Lawn Tonic—The Wonder Fertilizer—The Unequaled Garden Medicine.

Made in Rockford—This Is Not an Experiment But Has Been Used for Years with Excellent Results.

Extensive experiments have convinced us that this unequalled Fertilizer or Garden Invigorator is the most wonderful product of its kind ever offered. This last season we have given it final and exhaustive tests, which have proven beyond a doubt that it should be used in every State in the Union. No matter for what purpose, or under what conditions it was used, the results were always the same—simply marvelous.

A Petunia Bed, with our combination Invigorator sprinkled lightly on the soil, showed an increase in size of the flower, and more brilliant colorings. Vegetables planted in poor soil in July when others were well started towards bearing, not only made heavier yields, but matured almost as soon as the earlier planted garden. Lawns with an application of 25 pounds to 1000 square feet grew heavier sod of a richer color, and were still as green on December 1st as in the Summer time. Keep a bag on hand always. You will need it almost the year round. Packed in 3 size bags to meet all requirements. Shipped by Express or Freight at buyer's expense. 25 lbs. \$1.65; 50 lbs. \$2.60; 100 lbs. \$4.25.

Incomparable Plant Food

Odorless, soluble, harmless, efficient, easy to apply. A wonderful, well balanced tonic for all house plants. Sprinkle on the soil in the pot, just enough at a time to cover the surface. 25c package.

Protect Your Evergreens

"Dogzoff" is applied with any small insect sprayer and one application usually does the work.

"Dogzoff" will save its cost many times over around the garden and home. Price for season's supply 70c prepaid.

BUCKBEE'S BEAUTIFUL ASTERS

Aster Wilt and Aster Yellows are often caused by planting Asters in the same place year after year. Plant them in another part of the yard this time.

BUCKBEE'S CANARY BIRD ASTER

This wonderful Aster is no longer an untried novelty, having been grown by thousands of our customers, and is one of the finest we have ever offered. It is a robust, long stemmed, large flowering variety of exquisite beauty. Petals are broad and have the same color from base to tip. The flowers themselves are enormous and so double as to show no centers. Plants are branching, showing dozens of flowers at a time, and continuously in bloom until late Fall. Its greatest value lies in its unusual color, which lasts well on the plant, or when cut. Pkt. 10c; 1/8 oz. 50c.

BUCKBEE'S GIANT CREGO ASTERS

Crego Asters are truly grand Asters and are of American origin. The flowers are immense, from 4 to 5 and often 6 inches across. The plants are of luxuriant branching growth, attain a height of 2 feet, each plant bearing from 20 to 30 magnificent flowers on very long strong stems which are borne in great profusion during August and September.

BUCKBEE'S NEW AMERICAN BEAUTY ASTERS

Of the many Asters that are now grown, the American Beauty class continues a favorite everywhere. In the past few years this flower has been continually improved until it is now fully four to five inches in diameter. A great point in its favor is that it comes into its best bloom rather late—at a time when most other flowers are gone—and continues to blossom until frosts kill the plant to the ground. All four colors offered below come true from seed and are of fine form and size.

Carmine—Pkt. 10c; 1/8 oz. 40c.

The flowers are unusually large, 5 to 6 inches in diameter, very double and borne on long stiff stems. The petals are of good substance, consequently flowers remain a long time in perfect condition. Weather Plant

Wondrous Weather Plant

This beautiful plant has, during the last few years, created a great sensation. A local storm is indicated by the curling together of the leaves. Bears clusters of bright yellow flowers, followed by pods with brilliant red seeds used for making beads, etc. Seeds should be soaked in lukewarm water before planting. Pkt. 10c; ¼ oz. 25c.

Lady Washington Geraniums or Pelargoniums

Always in Bloom, Summer, Fall or Winter

A valuable class of house and garden plants related to the Geraniums, resembling them closely in character, habit and treatment. Pelargoniums revel in hot sunlight, withstanding temperature and glare that would shrivel other flowers. All they ask is plenty of water. They do not grow as dense or compact as Geraniums, consequently it is advisable to pinch back the long shoots once or twice prior to their blooming season in April, thus ensuring a nicely rounded, bushy shape.

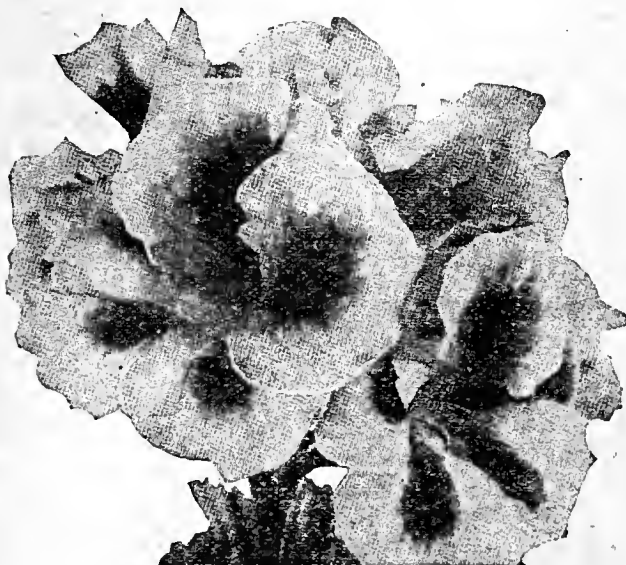

MARTHA WASHINGTON colors are variegated, ranging from crimson with dark blotch, to pure white-spotted, while many of them are heavily ruffled. 25c each; 3 for 70c, postpaid.

EASTER GREETINGS—A New Ever-blooming Variety. Flowers large and free; bright amaranth red, each petal marked with a large black blotch. VEITCHII (Boston or Japan Ivy)—The fashionable and most hardy wall climber of the day. Clings tightly to rock, brick, etc., and it is a wall of living green the Summer through, turning in Autumn to a flaming crimson, when it is certainly gorgeous. CLEMATIS

The Clematis we offer this season are extremely fine, strong 2-year-old plants. Many failures in the growing of Clematis are the result of too shallow planting. The crown of the roots should be set at least 3 inches below the surface of the soil. On account of the brittleness of the bark on Clematis, it cracks very easily, which, however, does not harm it in the least.

STRAWBERRIES

NOTICE—All varieties marked (S) are Staminate Perfect Flowering and Bi-Sexual varieties. All varieties marked (P) are Pistillate and destitute of Stamens. Therefore when planting varieties marked (P) it will be necessary to have every third row a Perfect Flowering or (S) variety to properly fertilize the bed; much finer fruit will be obtained by so doing.

For example—If your order calls for 200 Great Ruby (P) you should also have 100 Great Northern (S) to properly fertilize the bed. Plant the first two rows with Great Ruby (P) and the third row with Great Northern (S) and so on; or you can use any other (P) and (S) varieties in the same manner.

MONEY IN STRAWBERRIES

A strawberry Bed is a safe and sure investment. Greatest of all Money Makers. \$600.00 profit per acre. Only one expense—the cost of plants, which is merely nominal—lasts for years.

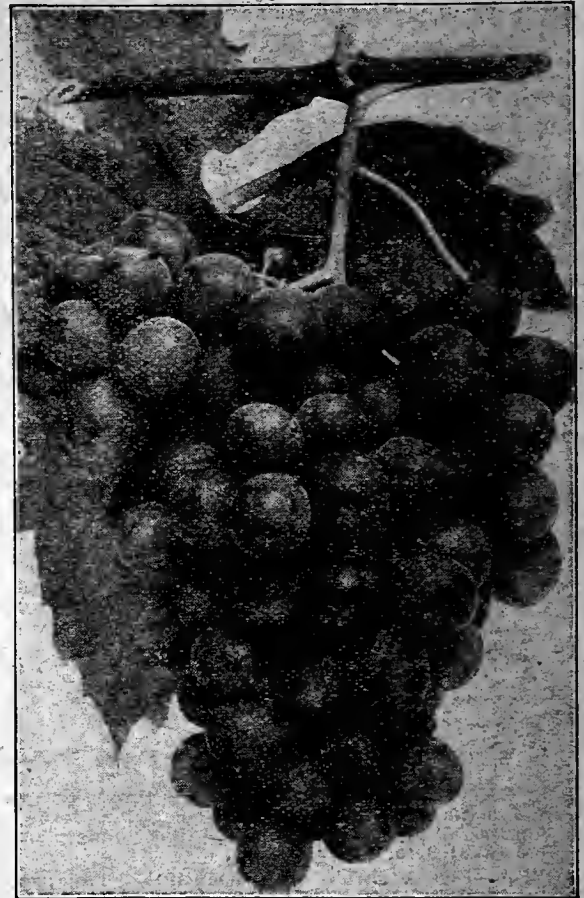

Everbearing or Fall-Bearing Strawberry

A dish of luscious strawberries in the fall is a luxury which everyone who owns a garden could enjoy. Plant at least twenty-five plants, but if you can spare the room plant 100 or more. Keep all blooms picked off in the spring and do not allow the plants to bear regular crops in June, thus conserving their strength for the fall crop.

Strawberry Plant Orders
